Free NCP-US Study Material | Test NCP-US Study Guide

By unremitting effort and studious research of the NCP-US actual exam, our professionals devised our high quality and high NCP-US effective practice materials which win consensus acceptance around the world. They are meritorious experts with a professional background in this line and remain unpretentious attitude towards our NCP-US Preparation materials all the time. They are unsuspecting experts who you can count on.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q82-Q87):

NEW QUESTION # 82
An administrator is upgrading Objects when the following error message is shown:

```
type[UPGRADE]:code: 500, message: error in processing pod: application post failed: image update
failed: unable to pull docker image 464585393164.dkr.ecr.us-west-2.amazonaws.com/nutanix-
msp/poseidon-zookeeper:buckets-1.0: err Max retries done: exit status 1 status_code: 500
```

type [UPGRADE] : code: 500, message: error in processing pod: application post failed: image update failed: unable to pull docker image 464585393164. dkr. com/nutanix- msp/poseidon-zookeeper:buckets-l.o: err Max retries done: exit status 1 status code: 500
How should the administrator resolve this error?

- A. Manually upgrade Objects Manager to the latest version.
- B. Manually upload the docker image to the bucket and rerun the upgrade.
- C. Perform Inventory then upgrade MSP and Objects Manager vie LCM.
- D. Upgrade and Objects service via LCM

Answer: D

Explanation:
LCM is a framework that automates software upgrades for various components of your Nutanix cluster. MSP is a service that provides authentication, authorization, auditing, and metering for Nutanix services such as Objects. Objects Manager is a web-based interface that allows you to manage your Objects clusters.

NEW QUESTION # 83
An administrator needs to create a volume group (VG) that will host highly sensitive dat a. These two requirements must be met:
* The VG must be accessible only by the OS where the data is going to be used by the application
* The access needs to be secured with an additional security login
Which three features or settings will help the administrator meet those requirements? (Choose two.)

- A. The VG configuration must contain only the IQN of the client OS where the application runs.
- B. CHAP authentication needs to be setup for that Volume Group.
- C. On-the-wire encryption must be enabled for all iSCSI traffic.
- D. All CVMs must have RDMA-capable NICs to facilitate direct peer-to-peer communication.

Answer: A,B

NEW QUESTION # 84
An administrator would like to convert an existing Volume Group with an attached external Windows client to use Volumes.
The administrator has taken these actions:
* Disconnect any existing iSCSI targets
* Remove targets from the Favorite Targets tab
* Remove targets from the Discovery tab
Which action must the administrator take next to complete this task?

- A. Connect without MPIO to the Cluster Virtual IP.
- B. Connect with MPIO to the iSCSI Data Services IP.
- C. Connect without MPIO to the iSCSI Data Services IP.
- D. Connect with MPIO to the Cluster Virtual IP.

Answer: B

Explanation:
Connect with MPIO to the iSCSI Data Services IP. The iSCSI Data Services IP (DSIP) is a virtual IP address that provides load balancing and failover for iSCSI traffic across all CVMs in a cluster. The MPIO (Multi-Path I/O) option enables multiple paths for iSCSI traffic between Windows clients and Nutanix Volumes. The Cluster Virtual IP (CVIP) is used for management and communication between CVMs and should not be used for iSCSI traffic.
https://portal.nutanix.com/page/documents/solutions/details?targetId=BP-2049-Nutanix-Volumes:BP-2049-Nutanix-Volumes

NEW QUESTION # 85
An administrator is migrating a legacy iSCSI solution to Volumes and needs to reconfigure the iSCSI initiator in the Windows client devices.
What should the administrator understand about the client-side iSCSI configuration?

- A. The Nutanix MPIO drivers should be installed.
- B. The Enable mufti-path option should be unchecked.
- C. IP addresses of all CVMs should be entered.
- D. IP addresses of all FSVMs should be entered.

Answer: D

Explanation:
IP addresses of all FSVMs should be entered. FSVMs are File Server Virtual Machines that provide iSCSI services for Nutanix Volumes. The iSCSI initiator in Windows client devices should be configured with the IP addresses of all FSVMs in a cluster to enable load balancing and failover. The Enable multi-path option should be checked to use multiple paths for iSCSI traffic. The Nutanix MPIO drivers are not required for Windows clients as they can use native MPIO drivers.

NEW QUESTION # 86
An organization is implementing their first Nutanix cluster. In addition to hosting VMs, the cluster will be providing block storage services to existing physical servers, as well as CIFS shares and NFS exports to the end users. Security policies dictate that separate networks are used for different functions, which are already configured as:
Management - VLAN 500 - 10.10.50.0/24
iSCSI access - VLAN 510 - 10.10.51.0/24
Files access - VLAN 520 - 10.10.52.0/24How should the administrator configure the cluster to ensure the CIFS and NFS traffic is on the correct network and accessible by the end users?

- A. Create a new virtual switch in Network Configuration, assign it VLAN 520, and configure the Files client network on it.
- B. Configure the Data Services IP in Prism Element with an IP on VLAN 520.
- C. Create a new subnet in Network Configuration, assign it VLAN 520, and configure the Files client network on it.
- D. Configure the Data Services IP in Prism Central with an IP on VLAN 520.

Answer: C

NEW QUESTION # 87
.....

The Nutanix NCP-US certification exam is one of the hottest and career-oriented Nutanix Certified Professional - Unified Storage v6.5 (NCP-US) exams. With the Nutanix Certified Professional - Unified Storage v6.5 (NCP-US) exam you can validate your skills and upgrade your knowledge level. By doing this you can learn new in-demand skills and gain multiple career opportunities. To do this you just need to enroll in the Nutanix NCP-US Certification Exam and put all your efforts to pass this important Nutanix NCP-US Exam Questions. However, you should keep in mind that to get success in the Nutanix Certified Professional - Unified Storage v6.5 (NCP-US) exam is not an easy task.
