100% Pass Quiz High-quality ISA - ISA-IEC-62443 - ISA/IEC 62443 Cybersecurity Fundamentals Specialist New Study Guide

BTW, DOWNLOAD part of Actual4Cert ISA-IEC-62443 dumps from Cloud Storage: https://drive.google.com/open?id=1l7wHNX8kqCFNUTRa8Ph5B1V4d3l5B2HF

May be you will meet some difficult or problems when you prepare for your ISA-IEC-62443 exam, you even want to give it up. That is why I suggest that you must try our study materials. Because ISA-IEC-62443 guide torrent can help you to solve all the problems encountered in the learning process, ISA-IEC-62443 Study Tool will provide you with very flexible learning time so that you can easily pass the exam. I believe that after you try our products, you will love it soon.

No matter how much you study, it can be difficult to feel confident going into the ISA/IEC 62443 Cybersecurity Fundamentals Specialist (ISA-IEC-62443) exam. However, there are a few things you can do to help ease your anxiety and boost your chances of success. First, make sure you prepare with real ISA ISA-IEC-62443 Exam Dumps. If there are any concepts you're unsure of, take the time to take ISA-IEC-62443 Practice Exams until you feel comfortable. Buy ISA/IEC 62443 Cybersecurity Fundamentals Specialist (ISA-IEC-62443) preparation material from a trusted company such as Actual4Cert. This will ensure you get updated ISA/IEC 62443 Cybersecurity Fundamentals Specialist (ISA-IEC-62443) study material to cover everything before the big day.

Exam ISA ISA-IEC-62443 Questions | Authorized ISA-IEC-62443 Certification

Our ISA-IEC-62443 training materials offer you everything you need to take the certification and face the challenge of professional knowledge points. The ISA-IEC-62443 exam dumps are written and approved by our IT specialist based on the real questions of the formal test. Our latest learning materials contain the valid test questions and correct ISA-IEC-62443 Test Answers along with detailed explanation. We will give your money back in full if you lose exam with our ISA-IEC-62443 practice exam.

ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q83-Q88):

NEW QUESTION # 83
What do the tiers in the NIST CSF represent?

- A. An organization's cybersecurity profile
- B. Categories of cybersecurity threats
- C. Stages of incident response
- D. Different types of cybersecurity software

Answer: A

Explanation:

In the NIST Cybersecurity Framework (CSF), "tiers" represent the degree to which an organization's cybersecurity risk management practices exhibit the characteristics defined in the framework (such as risk awareness, repeatability, and adaptability). Tiers range from Partial (Tier 1) to Adaptive (Tier 4) and describe the organization's overall cybersecurity maturity or profile.
Reference: NIST CSF v1.1, Section 2.2 ("Framework Implementation Tiers"); ISA/IEC 62443-1-1:2007, Section 4.2.7.

NEW QUESTION # 84
Which of the following provides the overall conceptual basis in the design of an appropriate security program?

- A. Asset model
- B. Reference architecture
- C. Reference model
- D. Zone model

Answer: C

Explanation:
The reference model provides the overall conceptual basis for designing an appropriate security program. The ISA/IEC 62443-1-1 standard introduces the reference model to explain the structure, concepts, and relationships within an industrial automation and control system (IACS). It establishes the foundation for applying zones and conduits and for understanding security levels and how assets interact. This model is the cornerstone for implementing other architectural and technical security controls.
Reference: ISA/IEC 62443-1-1:2007, Section 4.2, "Reference Model"; also see Figure 1 in 62443-1-1.

NEW QUESTION # 85
Which steps are part of implementing countermeasures?
Available Choices (select all choices that are correct)

- A. Establish the risk tolerance and update the business continuity plan.
- B. Establish the risk tolerance and select common countermeasures.
- C. Select common countermeasures and collaborate with stakeholders.
- D. Select common countermeasures and update the business continuity plan.

Answer: B

NEW QUESTION # 86
Which of the following is an industry sector-specific standard?
Available Choices (select all choices that are correct)

- A. D. ISO 27001
- B. NIST SP800-82
- C. ISA-62443 (EC 62443)
- D. API 1164

Answer: D

Explanation:
API 1164 is an industry sector-specific standard that provides guidance on the cybersecurity of pipeline supervisory control and data acquisition (SCADA) systems. API stands for American Petroleum Institute, which is the largest U.S. trade association for the oil and natural gas industry. API 1164 was first published in
2004 and revised in 2009 and 2021. The latest version of the standard aligns with the ISA/IEC 62443 series of standards and incorporates the concepts of security levels, zones, and conduits. API 1164 covers the security lifecycle of pipeline SCADA systems, from risk assessment and policy development to implementation and maintenance. The standard also defines roles and responsibilities, security requirements, security controls, and security assessment methods for pipeline SCADA systems.
References:
* API 1164: Pipeline SCADA Security, Fourth Edition, September 2021
* ISA/IEC 62443 Cybersecurity Fundamentals Specialist Study Guide, Section 2.2.2, Industry Sector-Specific Standards
* ISA/IEC 62443 Cybersecurity Fundamentals Specialist Exam Specification, Section 2.2.2, Industry Sector-Specific Standards

NEW QUESTION # 87
Which factor drives the selection of countermeasures?
Available Choices (select all choices that are correct)

- A. Security levels
- B. Foundational requirements
- C. Output from a risk assessment
- D. System design

Answer: C

Explanation:
The selection of countermeasures is driven by the output from a risk assessment, which identifies the risks and their associated likelihood and consequences for each zone and conduit in the industrial automation and control system (IACS). The risk assessment also determines the target security level (SL-T) for each zone and conduit, which represents the desired level of protection against the identified threats. The countermeasures are then selected based on the SL-T and the existing security level (SL-A) of the zone and conduit, as well as the cost and feasibility of implementation. The countermeasures should aim to reduce the risk to an acceptable level by increasing the SL-A to meet or exceed the SL-T. References: ISA/IEC 62443-3-2:2018 - Security risk assessment for system design, ISA/IEC 62443-3-3:2013 - System security requirements and security levels, ISA/IEC 62443 Cybersecurity Fundamentals Specialist Training Course

NEW QUESTION # 88
